

Following recent acquisitions, Dec Group continues to accelerate its growth and expands its product range, particularly in the field of aseptic and containment filling lines and Isolators. As a leader in the design and production of powder transfer, handling and containment equipment for pharmaceutical and Chemical industries, Dec Group offers global solutions throughout the production chain from the raw material handling to the final product packaging process. The group has more than 950 employees worldwide, including 120 employees headquartered in Switzerland.

For our office in Breda Netherlands we are looking for a:

Technical Director (M/F) – 100 %

Mission

As Technical Director of Dec NL, you'll be the driving force behind technological advancements, shaping the future of our products, and aligning innovation with our global strategy. You'll manage research, implement forward-thinking technology solutions, inspire and lead a team that is dedicated to excellence. In this role you liaise with other DEC subsidiaries in order to align technical developments and resources related.

Your role

What You'll Do

- Lead the change in identifying technological opportunities and risks that drive the business forward.
- Oversee R&D aligned with DEC Group strategy to ensure competitive product offerings.
- Ensure the application of cutting-edge technology, both internally and externally, with clear communication to stakeholders, customers, and investors.
- Own the technological landscape – from strategic products to standard operating procedures – and guide the company through the rapidly evolving tech environment.
- Manage the Engineering Department's including budgeting and reviews.

Lead a dynamic engineering team, nurturing talent and cultivating a culture of growth, cooperation and innovation

Your profile

- Industry Expertise: Significant experience in the pharmaceutical or bio-tech industry, ideally with 2nd or 3rd level management exposure.
- Global Vision: International experience with a deep understanding of customer and market demands.
- Leadership: Proven ability to lead teams, inspire collaboration and implement best practices.
- Tech Savvy: In-depth engineering and industry knowledge of aseptic, along with a strong grasp of regulations, compliance and cost strategies.
- Language Proficiency: Fluent in Dutch and English, with excellent communication skills to collaborate across sites and with external partners.
- Senior level Mechanical Engineering or similar
